ALI AHMED

DEVOPS & GENERATIVE AI ENGINEER

+92 317 0877234 | alyahmedrbk@gmail.com | Islamabad, Pakistan

LinkedIn | GitHub | Medium

PROFESSIONAL SUMMARY

DevOps and Generative AI Engineer with hands-on experience in AWS cloud infrastructure, CI/CD automation, containerized applications, and AI-powered solutions. Experienced with Docker, GitHub Actions, Terraform, Python, Node.js, RAG pipelines, vector databases, LLM integrations, and modern web applications. Strong in infrastructure automation, deployment workflows, troubleshooting, documentation, and structured problem-solving.

CORE SKILLS

DevOps & Cloud: AWS, Docker, Kubernetes, Terraform, Ansible, CI/CD, GitHub Actions, GitLab CI, Jenkins, Nginx, Linux

Generative AI: LLM Applications, RAG, AI Chatbots, AI Agents, Prompt Engineering, Embeddings, Vector Databases, Whisper, AI Automation

Programming: Python, JavaScript, TypeScript, Node.js, React.js, Flask, Bash, REST APIs

Databases & Tools: MySQL, MongoDB, PostgreSQL, SQL, Git, GitHub, JWT, API Integration

Web: Angular, React, Vite, Tailwind CSS, Material UI, Shadcn, Bootstrap

PROFESSIONAL EXPERIENCE

DevOps | Generative AI Engineer | Core Elite Experts Pvt Ltd

May 2026 – Present | Gilgit, Pakistan | On-site

- Work across DevOps and Generative AI engineering with a focus on cloud infrastructure, automation, deployment workflows, and AI-enabled applications.
- Apply Docker, CI/CD, AWS, Python, LLM integrations, RAG workflows, and API-based automation within modern application environments.
- Support structured troubleshooting, documentation, deployment reliability, and repeatable engineering workflows.

DevOps | Generative AI Engineer | Calibreen International

Sep 2025 – May 2026 | Gilgit, Pakistan | On-site

- Contributed to DevOps and Generative AI engineering initiatives involving cloud infrastructure, automation, deployment, and AI application workflows.
- Worked with containerization, CI/CD concepts, Python, LLM integrations, RAG, vector databases, and API-driven solutions.
- Supported debugging, technical documentation, structured problem-solving, and delivery of maintainable engineering solutions.

DevOps Engineer | Cloudlem

Jan 2025 – Sep 2025 | Gilgit, Pakistan | On-site

- Built and supported scalable AWS infrastructure with an emphasis on reliability, automation, and repeatable deployment processes.
- Provisioned infrastructure using Terraform and scripting, reducing manual configuration across environments.
- Implemented monitoring and logging for operational visibility, troubleshooting, and incident investigation.
- Designed Dockerized deployments with GitHub Actions CI/CD and maintained structured deployment workflows.

Frontend Engineer | Max Tech Pvt Ltd

Oct 2024 – Dec 2024 | Islamabad, Pakistan | On-site

- Developed responsive web applications using Angular, Node.js, and SQL.
- Contributed to full-stack development, REST API integration, debugging, documentation, and application deployment.
- Built maintainable user interfaces with attention to responsive design, usability, and application performance.

GENERATIVE AI PROJECTS

AI Video Assistant — Whisper, RAG & LLM
Built a workflow from YouTube URL to transcription, smart chunking, summarization, embeddings, vector search, and RAG-based chat; implemented timestamp-aware answers for source-video navigation.

Custom AI Knowledge Base Chatbot — RAG
Designed a document-aware chatbot architecture for PDFs, documents, and web data using document processing, embeddings, vector search, RAG, conversation history, and LLM responses.

Multi-Agent AI Automation System
Designed a supervisor-based agent workflow coordinating research, analysis, tool/API usage, structured task execution, and final-result generation.

AI-Powered Intelligent Assistant — LLM Automation
Designed an AI assistant architecture for business automation, conversational LLM support, document analysis, knowledge retrieval, API integration, and real-time data interaction.

CLOUD, DEVOPS & SOFTWARE PROJECTS

Scalable and Secure Web Application on AWS
Designed and deployed a highly available application using Auto Scaling Group (ASG), Application Load Balancer (ALB), AWS WAF, Ubuntu EC2, and Nginx; configured scaling from 2 to 4 instances based on CPU utilization.

TaskFlow — Secure Task Management Application
Developed a full-stack task management application using Flask, MySQL RDS, and a secure 3-tier architecture in a custom VPC with ALB; deployed the backend in private subnets with Gunicorn and Nginx.

ShopSphere — Production-Ready E-Commerce Platform
Built a SaaS-style e-commerce frontend using React, Tailwind CSS, Zustand, and Framer Motion; containerized the application with Docker and deployed it on AWS using GitHub Actions CI/CD.

SecureVault — Zero-Knowledge Password Manager
Developed an end-to-end encrypted password manager with React/TypeScript and Node.js; implemented client-side AES-256 encryption and Docker Compose containerization.

SecureBrowse Lite — URL & File Threat Detection
Developed a Chrome extension with a Flask backend for URL and file scanning using the VirusTotal API, with color-coded results, MySQL scan history, and a professional dashboard.

RealEstate React — Modern Real Estate Platform
Built a responsive React/Vite and Tailwind CSS application with property listings, search, and filtering; deployed the application on Vercel.

CERTIFICATIONS

- AWS Certified Cloud Practitioner — AWS
- Google Cybersecurity Professional Certificate — Google (Coursera), January 2026
- DevOps Mastery Specialization — KodeKloud (Coursera), August 2025
- Git and GitHub — Google (Coursera), December 2023
- Programming with JavaScript — Meta (Coursera), December 2023

EDUCATION

Bachelor of Science in Computer Science | COMSATS University Islamabad
Islamabad | 2020 – 2024

Intermediate in Computer Science | Army Public School and College Jutail
Gilgit | 2018 – 2020

LANGUAGES

Urdu | English
